

SUSTAINABILITY

Cormas Spa has obtained the RJC certification to be able to tell its stakeholders about its interest in working sustainably and spreading sustainability throughout the production chain.

In compliance with the OECD Guidelines and the European Regulation 2017/821, Cormas has carried out an assessment and qualification of the supply chain, deciding to work only with companies that meet and support the principles of sustainability and are in compliance with anti-money laundering regulations and the fight against activities that finance armed groups.

The RJC certification puts respect for Human Rights, respect for the Environment, Legality and compliance in economic transactions first.

The entire supply chain of Cormas Spa shares these principles and demonstrates its compliance following a careful Due Diligence assessment.

Cormas Spa has implemented a Due Diligence procedure applied to its supply chain and annually provides evidence, within the Sustainability Report, of the outcome of its application.

The goal is to create a better world, hindering the development of those entities that do not respect people, the surrounding environment and the law.

In the event of non-compliance detected in the due diligence procedure and the sustainability system, please refer to the attached reporting procedure.
